

Vending Machine Controllers

CUSTOM REBATES

- Custom rebates may be available for ENERGY STAR® qualified vending machines and other energy-efficient technologies not listed on this form.
- Equivalent vending machine controllers must be pre-approved by Efficiency Vermont. Rebates for these products will be determined by Efficiency Vermont on a case-by-case basis.

Please contact Efficiency Vermont for details.

WORK WITH EFFICIENCY VERMONT

There may be other opportunities to save money and energy, such as with lighting, HVAC, and refrigeration. Please contact Efficiency Vermont's Rebate Coordinator at 888-921-5990, ext. 1003 or info@efficiencyvermont.com.

Efficiency Vermont, the state's energy efficiency utility, helps Vermont businesses and households reduce energy to save money, strengthen the economy, and protect the environment. Include Efficiency Vermont on *your* project team.

Efficiency Vermont provides financial rebates for the purchase and installation of a VendingMiser® vending machine controller (shown at left).

What is a vending machine controller?

Using a passive infrared sensor, a plug-in vending machine controller completely powers down a vending machine during times of low use. One such product, the VendingMiser, controls indoor machines that dispense non-perishable cold beverages. Installation is very straightforward. For more information, visit www.usatech.com/energy_management.index.php.

To ensure products stay cold, the controller automatically re-powers the machine at one- to three-hour intervals depending on the room's temperature. An optional "sensor repeater" enables a single sensor to control an entire bank of vending machines.

Speak to your vending machine distributor *before* installing a VendingMiser on your vending machine.

How much will I save?

On average, a non-ENERGY STAR qualified cold-beverage machine consumes 427 watts costing

approximately \$350 per year to operate in Vermont. Powering down such a machine when not in use can result in annual savings of nearly \$175. The VendingMiser also reduces maintenance costs and extends the life of the vending machine by significantly reducing the number of compressor cycles run.

Type of Space	Estimated Savings vs. Non-ENERGY STAR Machine
Low-Traffic Areas (K-12 schools, 5 day/week offices)	58% - \$200/year
Medium-Traffic Areas	48% - \$175/year
High-Traffic Areas (cafeterias, dorms, convenience stores, 7 day/week office)	38% - \$133/year

What is the rebate amount?

The VendingMiser retails direct from USA Technologies. Efficiency Vermont offers a rebate of \$45 for each new unit purchased and installed, making it possible to recoup the purchase price in energy savings in about a year.

To receive your rebate(s), read, complete and sign this application and submit it with the sales receipt(s) or invoice(s) itemizing your new equipment. The proof of purchase must indicate the date and place of purchase, as well as the manufacturer and model or part number of the equipment. Please check to make sure you've provided all information requested. Incomplete information will delay the processing of your application.

- *All electric utility customers except those in Burlington:* Send this completed application with your receipt(s) to Efficiency Vermont, Rebate Coordinator, 255 S. Champlain St., Burlington, VT 05401.
- *Customers served by the Burlington Electric Department:* Send this completed application with your receipt(s) to Energy Services Area, Burlington Electric Department, 585 Pine St., Burlington, VT 05401.

TERMS & CONDITIONS

REBATE OFFER: This rebate program covers any VendingMiser purchased and installed in 2010. Details of this program, including rebate levels, are subject to change without notice.

ELIGIBILITY: Rebates through this program are available to business customers of electric utilities in Vermont. For information regarding custom rebates, please contact Efficiency Vermont. Contact Burlington Electric Department at 802-865-7342 for all Burlington projects.

ELIGIBLE EQUIPMENT: VendingMisers must be new and installed indoors to qualify for rebates. Custom rebates for outdoor installations may be available based on demonstration of energy savings by the customer to Efficiency Vermont. Equivalent products must be pre-approved by Efficiency Vermont. Contact Efficiency Vermont for information about additional equipment not listed on this form that may qualify for custom rebates.

PROOF OF PURCHASE: Sales receipt(s) or invoice(s) itemizing the new VendingMiser (or other pre-approved controller) and indicating the manufacturer, model, purchase date, and vendor must accompany each rebate application.

PAYMENT: Equipment must be purchased and installed before payment is issued. Falsifying any information may lead to cancellation of this and future rebate applications, a claim by Efficiency Vermont for the return of any rebate, and/or referral for prosecution. Allow 45 days for delivery of payment. Submitting an application with incomplete or missing information will delay check processing and delivery. Efficiency Vermont will not pay more than 100% of the material purchase price shown on the invoice.

APPROVAL & VERIFICATION: Rebates exceeding \$2,500 require pre-approval by Efficiency Vermont before purchase. Efficiency Vermont reserves the right to verify sales transactions and to inspect all installations.

TAX LIABILITY: Efficiency Vermont is not responsible for any tax liability imposed on the customer for rebate payments.

ENDORSEMENT: Efficiency Vermont does not endorse any particular manufacturers, products, or system designs in promoting this program. Contact Efficiency Vermont with any information you may have regarding plug-in vending machine controllers other than VendingMiser.

DISPOSAL: The customer/contractor is responsible for the proper disposal/recycling, including all associated costs, of any waste generated as a result of this project.

SAFETY & BUILDING CODES: The customer/contractor agrees that each measure complies with all federal, state, and local safety, building, and environmental codes, and that all necessary permits have been obtained. All products must be UL-listed and installed per manufacturer's instructions.

CUSTOMER ASSURANCES: If the facility is leased or managed by customer, customer must obtain written permission from owner to install new equipment.

CONFIDENTIALITY: All customer, vendor, and/or contractor information supplied to Efficiency Vermont will be kept confidential and will not be shared with any person or organization.

DISCLAIMER OF WARRANTIES: Efficiency Vermont does not warrant the performance of any equipment either expressly or implicitly. Contact your supplier or contractor for details regarding equipment warranties.

CAPACITY CREDITS/ENVIRONMENTAL CREDITS: In accepting these financial incentives, the customer agrees that Efficiency Vermont holds the sole rights to any electric system capacity credits and/or environmental credits associated with the energy efficiency measures for which incentives have been received. These credits will be used for the benefit of Vermont ratepayers.

Contact Efficiency Vermont for details on other eligible measures and services, or for answers to any questions you may have about equipment eligibility for this program. Call Efficiency Vermont's Rebate Coordinator toll-free at 888-921-5990, ext. 1003.
